

What was their experience of learning after your advice? Was it successful? What problems did they have?

It has been very good for her to be in this group, they have become close friends and are enjoying school. She is motivated and wants to learn. Her problem is that she is very often sick and always very tired. She has no energy or motivation to study more than what she already does.

Your observations about your interaction with this learner.

We have a very good relation, and she really appreciate that. She is very grateful that I try to help her with the Swedish as much as I can. We talk about her health problems and how that effect her energy, and how she can get help.
